

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

1. (Currently Amended) A windshield washer fluid reservoir tank device for a vehicle comprising:

a washer fluid reservoir tank, which is internally defined with an elongated washer fluid receiving space, and is externally formed with a side stepping surface that allows a user to step on the side stepping surface while boarding or alighting from the vehicle;

a plurality of posts affixed at one surface of the washer fluid reservoir tank so that the posts protrude upward in a vertical direction;

a plurality of fixing members integrally formed at the posts in a one to one ratio, and contacting an inner surface of a vehicle body panel so that the fixing members are fixed thereto;

a washer fluid supply motor pump which is mounted on a bottom lateral region inside the washer fluid reservoir tank and is adapted to eject the washer fluid toward a windshield of the vehicle through supply hoses; and

a washer fluid feeding pipe protruding upward from an upper side portion of the washer fluid reservoir tank and having a cap to be opened for replenishment of the washer fluid.

wherein the windshield washer fluid feeding pipe comprises a winkled portion

configured to be bent in a desired direction, and each of the fixing members is integrally formed at a side of each of the posts.

2. (Canceled)

3. (Previously Presented) The device as set forth in claim 1, wherein the side stepping surface of the washer fluid reservoir tank is formed thereon with a lattice pattern that endows a skid-proof function thereto.
